

ASP.NET Database Programming Weekend Crash Course

Open the book on Friday evening and by Sunday afternoon - after completing 30 fast, focused lessons - readers should have mastered the skills necessary to begin creating robust, dynamic data-driven Web applications with ASP.NET. Starting with ASP.NET basics, this book teaches readers what they need to know to begin creating ASP.NET applications quickly and then dive into building database applications with ADO.NET, Web Services, SOAP, XML and more. The CD contains sample applications and source code contained in the book, as well as custom assessment software so that readers can assess their progress.
