

Stuttering (Coping)

Many of our teenagers find themselves facing a host of problems they know nothing about. These six new Coping titles will provide teens with information and clarification on some of life's confusing problems. What greater obstacle to a normal social life can teens face than the inability to express themselves or the fear of even trying? This book discusses the latest medical thinking about the causes of stuttering and the value of speech therapy, and it offers insight and psychological support to teens who must struggle with this difficult problem.
