

Inside Dreamweaver UltraDev 4 (Inside (New Riders))

No other book is positioned to perform for the intermediate-through-advanced user market like Inside UltraDev 4. Each chapter first provides a detailed description of the chapter topic including call-outs that alert the reader to potential pitfalls. This discussion is followed by a step-by-step exercise, during which the reader will construct an element of a Website based on the chapter topic. The final section of each chapter focuses specifically on technical aspects. These discussions range from the detailed analysis of specific code to the troubleshooting of common database connectivity issues and provide advanced users with the ability to extend the results of the exercises. The exercises in each chapter come together to form a complete project that constructs a fully-functional Website.
