

Microsoft Office Access 2007 VBA

Business Solutions Microsoft Office Access 2007 VBA Develop your Access 2007 VBA expertise instantly with proven techniques Microsoft Office Access 2007 VBA builds on the skills youve already developed in creating database applications and helps you take them to the next leveling Visual Basic for Applications (VBA) to accomplish things you once performed manually. To facilitate this lofty goal, Access includes the VBA programming language. Even if youve never programmed, this book will help you learn how to leverage the power of VBA to make your work with Access more efficient than ever before. Microsoft Office Access 2007 VBA is for professionals who use Microsoft Access frequently in their daily work. You have serious work to get done and you cant spend all day reading a computer book. This book teaches you the essential skills you need to automate your databases as quickly as possible. Although written for Access 2007, the techniques and concepts covered will work in most versions of Microsoft Access. Highlights of This Book Include Navigating within the Visual Basic Editor Using variables, constants, and data types Employing built-in functions Creating procedures Understanding object-and event-driven coding Working with arrays Understanding scope Working with forms Using selection controls Creating reports Exploring menus, navigation, and ribbons Using object models Working with data Defining database schema Using the Windows API Working with XML files Exploring Access SQL On the Website Download database files used in the book at www.quepublishing.com. Category Office Applications Covers Visual Basic for Applications User Level Intermediate - Advanced Scott B. Diamond is a seasoned database designer and Microsoft Access 2007 MVP. During the last 20+ years, he has designed

databases on a wide range of platforms, including dBASE, FoxPro, SQL/DS, Lotus Approach, Lotus Notes, and, for the past 10 years, Microsoft Access. Scott has worked as a consultant, both in-house and freelance, and as a support professional at firms that are among the leaders in their industries. Scott spends some of his free time answering questions at the premier site for Access support: <http://www.utteraccess.com>. Brent Spaulding started writing applications about 20 years ago and has utilized Microsoft Access since version 2.0. He looks forward to using Access well into the future. In July 2007, he received the Microsoft MVP award for Access, which recognizes his talent and contributions to the Access community. Front cover bullets: Edit and debug your code Use looping and conditional statements Understand the Access object- and event-driven architecture Automate data entry Learn how to use variables for dynamic automation Create user-friendly applications for others Create custom functions and objects Customize the user interface Manipulate data and objects with code
