

Open Source Software for Small Business

Many people and small businesses struggle with the cost of proprietary software. As the world becomes better connected and more digital, the need for business software is no longer a luxury, but a necessity. This book highlights over 35 free and open source software packages that are alternatives to often costly subscriptions and license fees. All of these titles are free to download and use. Free in the sense that you have the freedom to use them in your personal life, business, or even academically; without cost or fees.
